*Swivel and visitor chair for
universal use*

Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany”.

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. A particular emphasis is placed on the health and well-being of the users.

neck support
offers even more comfort for the desk chair and high desk chair

The visitor chairs are stackable up to
5 units high
for compact storage

Certifications for se:do

se:do

Sociable, reliable, attractive: se:do appeals to everyone

People are different. People come in all shapes and sizes with diverse preferences. Modern forms of work such as smart working or non-territorial space concepts, where various individuals share one workstation, are driving demand for more flexible office furniture. The se:do swivel chair ticks all the boxes. Thanks to its ergonomic versatility, it can be adjusted to new users quickly and easily and is ideal for multi-user workstations and open spaces. Add to that a high level of comfort and a distinct design, and you have a highly regarded team member in every respect.

The timeless design has already won several awards

COMFORTABLE, VERSATILE, ERGONOMIC

Designed with people in mind

se:do's special features include ergonomic functions that are easy to adjust, ensuring that alternating users will always have a healthy and comfortable sitting posture. Even the standard version of se:do has an ergonomically formed seat pan and a height-adjustable backrest with a wide opening angle, which provides maximum back support in all positions. The Sedus "similar" mechanism allows the seat and backrest to always move in sync with the body. Numerous adjustment options round off the ergonomic properties, making every user feel relaxed and comfortable – regardless of their weight.

Good for health

The height-adjustable backrest adjusts to different body sizes and has an optional lumbar support that can be adjusted in depth.

Good ergonomics also depends on adjustability

Height of the backrest

The height-adjustable backrest adjusts to different body sizes and has an optional lumbar support that can be adjusted in depth.

Seat tilt

The tilt angle of the seat can be adjusted by up to 4 degrees, allowing a slightly forward tilted sitting position.

Seat depth

Being able to adjust the depth of the seat by up to 60 mm ensures that the thighs will be supported perfectly regardless of body size.

Support pressure and opening angle

The patented Sedus quick adjustment feature allows the backrest pressure and opening angle to be easily adjusted.

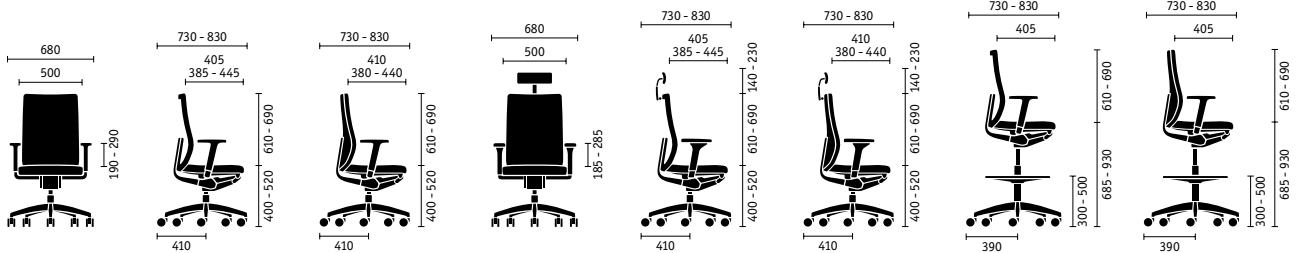

Armrests

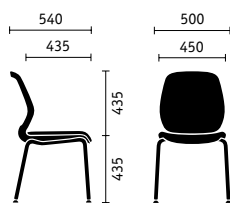

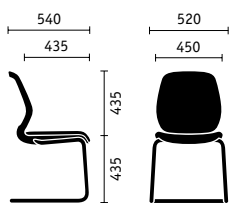

If desired, se:do is available with 4D armrests with soft-touch pads that can be adjusted without tools.

Headrest and coat hanger

The height and inclination of the optional headrest can be adjusted to relieve the cervical spine. The headrest can be combined with a practical coat hanger.

VISITOR CHAIRS

Light and universal in design

The visitor chair takes up se:do's distinct and discreet design, so that it can be easily integrated into office, training and waiting areas. It fulfils exactly the requirements that are placed on it: Design and quality that are future-proof and can easily cope with adjustments and restructured environments. The se:do visitor chair is available as a four-legged or cantilever version and can optionally be equipped with armrests.

In line with the swivel chair, the backrests of the visitor chairs can be fitted with a comfortable upholstery or a light membrane.

The four-legged model is also available with castors and can be stacked (up to 5 chairs high) to save space. A transport trolley is optionally available.

FORM AND FUNCTION

se:do has your back, literally

se:do owes its ergonomic seating experience especially to its high backrest, which is available in two versions. One is fully upholstered, emphasising the overall comfortable look. The other version has a mesh backrest with the innovative Sedus “climacontrol” membrane, which regulates the seat climate, similar to sports and functional clothing. The seat shape has been incorporated into the membrane and provides a high level of comfort.

Full upholstery

The full upholstery follows the shape perfectly, giving it a pleasantly understated look. It can be easily adapted to any environment or corporate identity thanks to the wide range of Sedus fabrics.

Membrane

The translucent mesh backrest creates an informal atmosphere, especially in open spaces with lots of workstations. Its durable membrane can be designed in four modern colours.

VERSIONS AND DIVERSITY

Combined comfort

se:do can be individually designed to match the surroundings and meet personal requirements. There are almost endless possibilities for combination. In addition to the upholstery and membrane, there is a wide range of colours to choose from for the seat and frame.

Designed to fit

A harmonious working environment contributes significantly to well-being and productivity. Well-conceived furnishings, pleasant fabric and material combinations as well as the choice of colour accents are key factors for achieving this goal. Whether Smart Balance, Soft Being, Urban Living or Multi Creation – the se:do products can be modified to suit any of these colour schemes.

Do you need support in planning and implementation?

The experts from Sedus Workplace Consulting are looking forward to helping you design your modern smart office. From analysing the floor plan and designing the concept to choosing the colour from the Sedus colour cookbook – Sedus offers everything from a single source.

Smart Balance

light, reduced, quiet, structured, functional, technical

Urban Living

comfortable, respectable, elegant, urban, intense, timeless

Soft Being

gentle, calm, balanced, natural, inviting, regenerative

Multi Creation

motivating, inspiring, creative, dynamic, active, open, free
