Foldable conference table

The clever solution for multifunctional rooms: Sedus mastermind fold – a high-quality, representative conference table that seats up to eight people and takes up little space when it is no longer needed. Thanks to the sophisticated folding mechanism even people who are not so strong can set it up or put it away easily. A smooth transmission, in conjunction with high-performance gas springs, ensures particularly efficient power transmission, so the table can quickly and easily be unfolded and folded. The table tops are automatically locked when unfolded thanks to the unique Sedus Securelock System, making them safe even before locking. mastermind fold is extremely well suited to variably used conference floors and sophisticated seminar environments. As a mobile counterpart to the mastermind conference table system, this folding table is also always on hand when additional places need to be added.

Performance features

Characteristics

mastermind fold is suitable for multifunctional rooms because it can be folded together to save space when not in use. Unfolded it seats up to eight people.

Efficient transmission of power

The folding mechanism, in conjunction with gas springs, ensures particularly efficient power transmission, so that the table can easily be unfolded and folded.

Secure-Lock system

Thanks to the Secure-Lock system the table is pre-engaged. This means nothing can happen if, for example, someone should sit on the end of the table top.

Locking of the table halves

The locking system guarantees trouble-free movement of the table top abutment and can be operated from each side of the table by means of a lever.
