Analog Devices, Inc. (ADI) empowers the Intelligent Edge with the most innovative analog, digital, and software solutions, accelerating breakthroughs that benefit society and the planet.

## BACKGROUND

M2 Office Interiors were delighted to work with EML Architects and Analog Devices team to create a unique, agile space to facilitate ground-breaking technologies at an accelerated pace.

## ABOUT THE PROJECT

At M2 Office Interiors we wanted to make sure that Analog Devices had all the right tools to make this building a truly multifunctional space. That means we along with EML Architects developed zoned areas for private meeting with multiple closed meeting room and soundproof booths. The Actiu Talent Desk was installed due to its versatility and ease of storage. The Desk can be simply folded upright and moved to a storage area when not in use.

## RESULTS

Analog can now help their customers, collaborators and supplier achieve their goals in a flexible environment that changes depending on the customer or teams needs. Customers can now interact with their people, technology and expertise more easily meaning work and ideas will flow and be completed in a more efficient and dynamic way
