

Engine Lease Finance

M2 Office successfully executed the fit-out for Engine Lease Finance, prioritizing employee well-being and cultivating a conducive work environment. Collaborating closely with the client, we tailored solutions to enhance functionality and comfort.

BACKGROUND

M2 Office Interiors were tasked with creating a wellness area where employees could go to zone out along with fitting out office desks and meeting rooms.

ABOUT THE PROJECT

M2 Office aimed to infuse **biophilic** elements into the wellness area, creating a serene ambiance. This was accomplished by incorporating moss-colored carpet tiles, tall tropical plants, and an eye-catching feature wall.

Ensuring modernity and sleekness were paramount for the office and meeting areas. **Ergonomic** chairs and **height-adjustable** desks were seamlessly integrated into the open office space to prioritise employee comfort and prevent injuries.

RESULTS

The wellness area now exudes tranquility with biophilic elements like moss-colored carpet tiles, tropical plants, and a striking feature wall. In the office, modern design prevails, promoting productivity and collaboration. Ergonomic furniture ensures employee comfort and reduces the risk of injuries, fostering a healthier work environment.
