

# Future Mobility Campus

Future Mobility Campus Ireland (FMCI) was founded with the sole purpose of creating and delivering future mobility testbed facilities for stimulating research, development and innovation in the area of Autonomous Connected Electric Shared Vehicles (ACES), including Connected and Autonomous Vehicles (CAV) in Ireland. The testbed will be located in the Limerick-Shannon metropolitan area at Shannon Free Zone, Shannon, Co.Clare.

## BACKGROUND

The client needed a space that would accommodate stimulating research, development and innovation in the area of Autonomous Connected Electric Shared Vehicles (ACES), including Connected and Autonomous Vehicles (CAV) in Ireland.

## ABOUT THE PROJECT

Working with PS Carmody Contractors we designed and furnished numerous office areas, meeting rooms, canteen and labs.

The company had a simple goal: cohesion. The layout applies a sense of community, togetherness and collaboration. With multiple work areas and agile furniture means the space will adapt to any task or team.

## RESULTS

The result of this project is a contemporary twist on modernism. The minimalist look will let the cars, drones, and software that Future Mobility Campus Ireland create do the talking. It's been an incredible exciting and unique project. The team at Future Mobility Campus Ireland and PS Carmody Contractors have been a delight to work with. We can't wait to see all the amazing things that they develop.
