

Ingenium

M2 Office collaborated closely with Ingenium to address these challenges comprehensively. The first priority was to enhance employee comfort and well-being.

CHALLENGES

The office lacked ergonomic furniture, causing discomfort and decreased productivity. Insufficient storage space also disrupted organizational efficiency and cluttered the office.

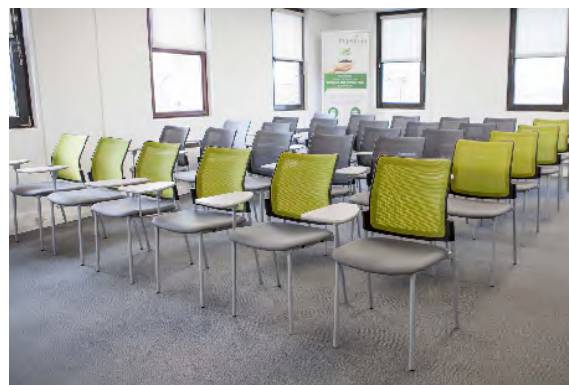

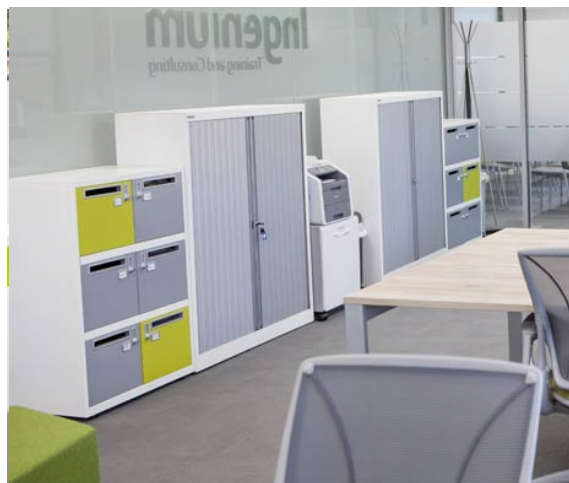

SOLUTIONS

Ergonomic chairs and monitor arms were chosen to improve posture and reduce strain during work. Cable management solutions were added for a tidy workspace.

Soft seating, in line with Ingenium's brand colors, was placed throughout the office, offering both aesthetic appeal and comfortable spaces for collaboration and relaxation.

RESULTS

The collaborative efforts between Ingenium and M2 Office resulted in a successful office design project that not only met but exceeded expectations. The transformed workspace now embodies comfort, functionality, and aesthetic appeal

Ingenium

“M2 Office provided the full turnkey service and Project Managed all works involving us where necessary. We found the entire project stress free as M2 Office Interiors handled everything directly. We received regular updates from M2 throughout the process. All milestones & deadlines were met giving us peace of mind our move was achievable.

Overall we are delighted with the end result and wouldn't hesitate to work with M2 Office Interiors again.”
