Product Brochure

Islands

Islands is a collection of intelligently designed modules which can be configured in an infinite number of ways to create a multitude of settings and space division solutions. Designed to foster collaboration and provide an alternative to a meeting room, Islands seating modules can be shaped to create environments for presenting, focussing, or waiting. When paired with the Islands planter modules, the space created improves workplace wellbeing through biophilia and the absorption of ambient noise, alongside aesthetically zoning settings, whilst power modules support those longer collaborative sessions.

Seating modules are available with either non-fixed cushions or upholstered seat pads for comfort and a prolonged sit time. Available in 11 x woodgrain and solid colour material options, Islands is highly customisable to compliment any aesthetic requirement.
