

Limerick Council

When Limerick City Council spoke with our experts, we quickly assessed their needs, goals and wants. This information helped us tailor the office fit out process to meet their specifications making sure that M2 Office Interiors exceeded expectation while staying on budget

BACKGROUND

Once the initial measurements are taken the project manager provided the client with a guide of what can be accomplished in the space, our expertise helped maximise their space so that storage, desking layouts and facilities were placed in the optimal positions for maximum performance.

ABOUT THE PROJECT

This project was completed during the covid 19 pandemic so it was important that all safety precautions were adhered to and that M2 Office created a safe and spacious environment for Limerick City Council. We wanted to make sure the space had enough room to grow with adequate spacing between desks for safety and social distancing while also maximising what can be done in the space. Dividers were also used for the dual purpose of adding that extra layer of protection for staff working from the office and as a sound absorber for when multiple occupants are making calls.

RESULTS

This project was finished within the timeframe and budget given. The new office space at limerick city council is now modern, bright and spacious. The yellow and teal hues throughout inject energy and positive vibes into the space.
