

Management Company

This company came to M2 Office Interiors with a clear vision for how the design of their premises should have a flow,

BACKGROUND

This company came to M2 Office Interiors with a clear vision for how the design of their premises should have a flow, design that's on brand and a focus on their staff's wellbeing. For this reason, M2 Office Interiors went with an interface modular flooring that incorporated the companies colours and used plants where possible to bring much needed life to the building interiors.

ABOUT THE PROJECT

The project consistent of designing zoned areas in an open plan design that would help departments work together but without interfering in each other's work. An open plan office with collaboration in mind was developed.

For those looking to get further privacy can make use of the multiple acoustic meeting pods, perfect for private phone calls or sensitive meeting topics

RESULTS

The project resulted in a modern open-plan office with designated private meeting areas. By incorporating green colors and plants, we've created a welcoming environment that connects employees to nature, enhancing both aesthetics and well-being.
