

Bluebird Health Care

M2 Office Interiors were delighted to be asked to specify furniture to BKM Design architects.

BACKGROUND

The architect (BKM Design) took great care in designing a layout to complement this space. Seamless glass partitions are used throughout. M2 Office worked with the architect to specify modern style of furniture to carry the theme and colour scheme into every detail.

ABOUT THE PROJECT

From sleek desks to ergonomic chairs and stylish accessories, every detail was carefully selected to enhance the overall aesthetic and functionality of the workspace. Through this collaborative approach, the office environment embodies a cohesive and sophisticated design, reflecting the combined expertise of both M2 Office and BKM Design.

RESULTS

The finished result is a well thought out functional space in keeping with the clients brand identity.

Bluebird Health Care

“Our brand colours formed the bases of the colour scheme which was adhered to in great level of detail by M2 Office Interiors. We wanted a modern style office using good Ergonomic products for our staff giving a light feeling throughout the office. The project had a tight timeline and budget, both were met by M2 and we are very happy with the result. I feel the furniture suits our unique premises and fits with our brand image. I would be happy to recommend M2 Office Interiors as an excellent supplier & fit-out solutions provider.”
