

DB Schenker

DB Schenker are a logistics and supply chain management industry providing thousands of products for customers who are focused on finding the best shipping solution.

BACKGROUND

DB Schenker's site stood as a blank canvas, awaiting transformation. M2 Office seized this opportunity to work hand in hand with the architects, leveraging our expertise to infuse the space with innovative design concepts while staying true to DB Schenker's green ethos.

ABOUT THE PROJECT

One of the key challenges was to address the diverse needs of the employees while maintaining the site's **green credentials**. To achieve this, M2 Office meticulously planned the layout, ensuring optimal workflow and **ergonomic comfort**. In line with DB Schenker's **sustainability goals**, we sourced **eco-friendly materials** for both built-in fixtures and loose furniture.

Our design philosophy embraced the concept of **biophilic design**, integrating elements of nature into the workspace. Natural light, indoor plants, and organic textures were strategically incorporated to foster a connection with the outdoors, promoting employee well-being and productivity.

RESULTS

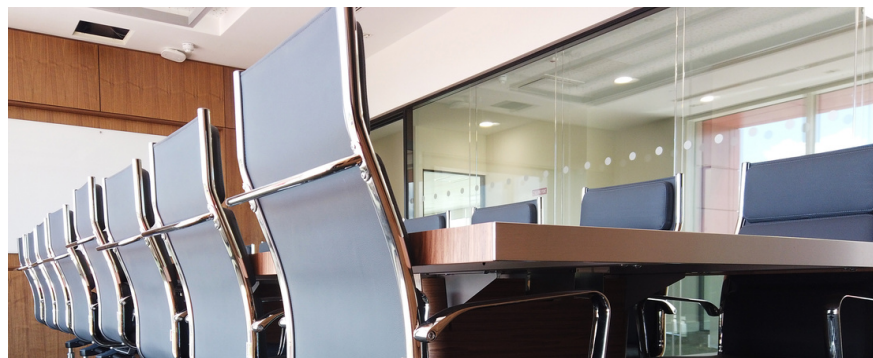

Throughout the project, M2 Office remained committed to exceeding DB Schenker's expectations. By synergizing our expertise in interior design with the architects' vision, we created a workspace that embodies **sustainability, employee well-being, functionality, and aesthetic appeal**.
