

# Gardens International

The Gardens International is an iconic office development that reimagines one of Limerick's most historic and innovative buildings for the 21st century. M2 Office Interiors worked closely with the client and Architect on the furniture specification to meet a design brief from Uber London.

## BACKGROUND

M2 Office's visionary interior design project for International Gardens. Embarking on this endeavor, we encountered a unique challenge: the site was a blank canvas, awaiting transformation. Undeterred, we embraced the opportunity to envision and craft an inspiring space from scratch.

## ABOUT THE PROJECT

Recognizing the importance of visualizing the end result, we meticulously drafted both 2D and 3D versions of the proposed plans. These renderings provided our clients with a tangible glimpse into the future, allowing them to envision how the space would come to life once completed.

## RESULTS

The resulting space is bright, welcoming, and built to last, reflecting a commitment to quality and longevity.
