

# Rockwell Engineering

Rockwell Engineering work across a broad spectrum of industries including Medical, Electronics Pharmaceutical and Food & Dairy. Rockwell we specialises in clean room construction, HVAC Services

## BACKGROUND

Tasked with breathing new life into the workspace, we embarked on a journey to reimagine the environment while adhering to timelines and budgetary constraints.

## ABOUT THE PROJECT

In the canteen area, we initiated a strategic overhaul to enhance both functionality and style. New doors and cabinets seamlessly integrated into the kitchen's existing layout, adorned in a sophisticated deep grey hue for a contemporary touch.

To revitalize the space further, we opted for a brighter faux wooden flooring, infusing warmth and vibrancy into the area. This subtle change created an inviting atmosphere conducive to socializing and relaxation. Additionally, we revitalized the kitchen's aesthetic appeal by painting the old tiles black, adding a modern and sophisticated flair that complemented the sleek grey cabinetry and vibrant flooring seamlessly.

## RESULTS

Through strategic upgrades such as new cabinets, flooring, and a sleek color palette, we've created a space that not only maximizes efficiency but also exudes contemporary elegance. This transformation not only meets but exceeds expectations, providing a refreshed environment where employees can enjoy both work and leisure in style.

# Rockwell Engineering

“Working with Rosemarie and her team on our office renovation was a pleasure! Each of M2's personnel were professional and prioritised an acute attention to detail. Despite all the moving parts, nothing slipped through the cracks. Many areas we're converted from unkept storage rooms to state of the art office and collaboration areas. Rosemarie herself assured a project delivery that was on time and within our budget, we finally have a premises that not only our staff deserve, but that we are proud to call our company headquarters”
