se:hive

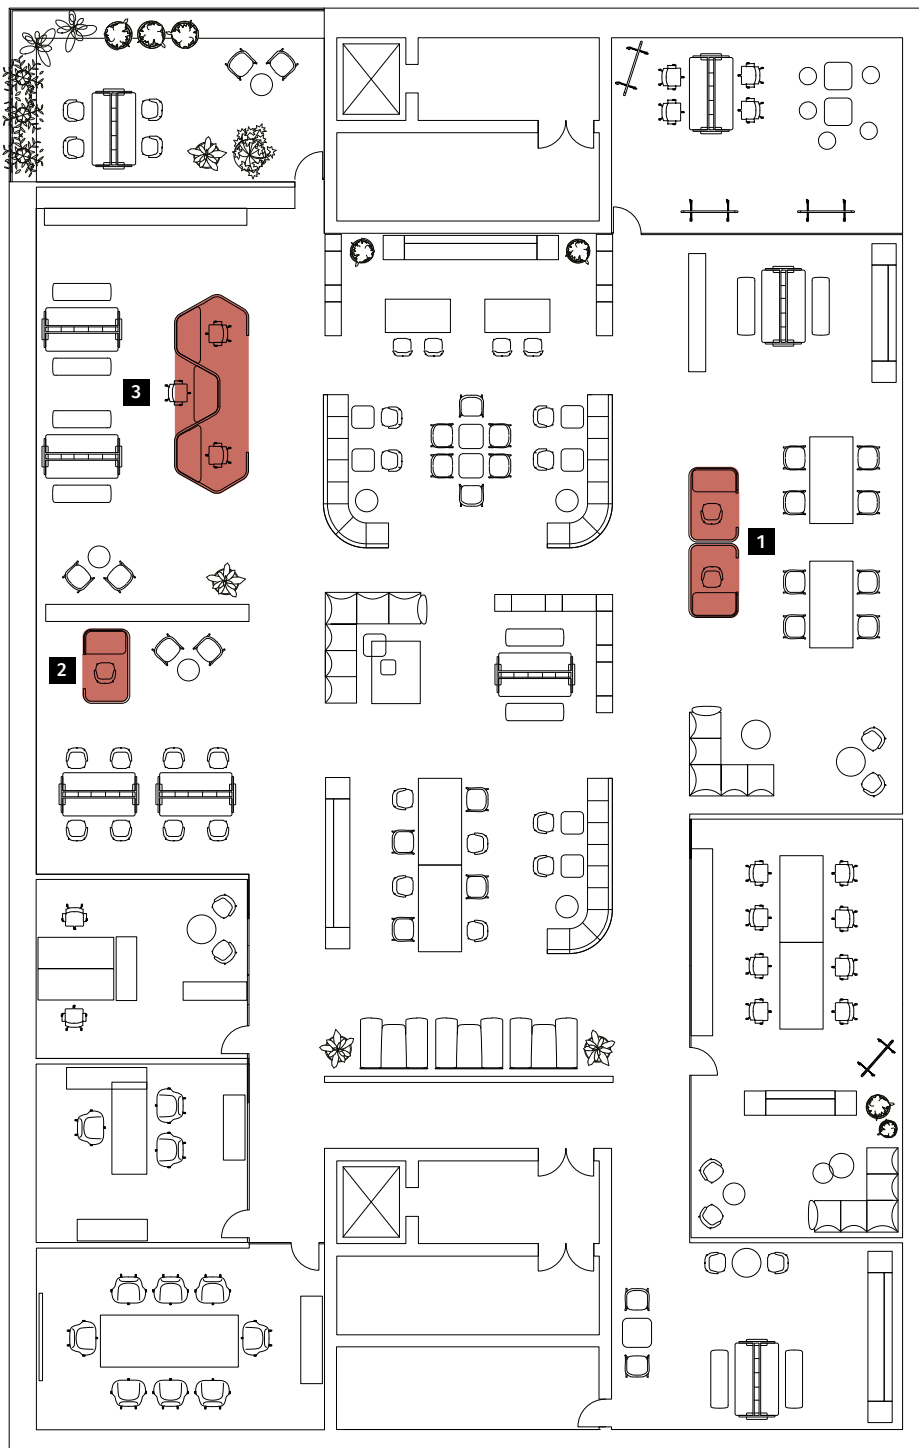

Open and secluded

Social interaction and working together play a central role in the Sedus Smart Café concept. However, retreat and focus are also essential to support the requirements of modern working environments. This is exactly where se:hive comes in: An innovative safe haven that makes it possible to strike a balance between collaboration and concentrated individual work. With its modular, fabric-covered elements, se:hive creates flexible workspaces that can be customised to the desired degree of shielding. Whether for focused working, video calls or informal solo working – se:hive offers the ideal solution for modern office environments. Its open design ensures favourable acoustics without isolating users from the environment, while optional back closures and higher shields provide additional protection and peace and quiet. The combination of ergonomic design, acoustic effectiveness and versatile configurations make se:hive the perfect safe haven in the Smart Café. It helps employees to work in a focused and productive manner without having to give up the inspiring atmosphere of the open office.

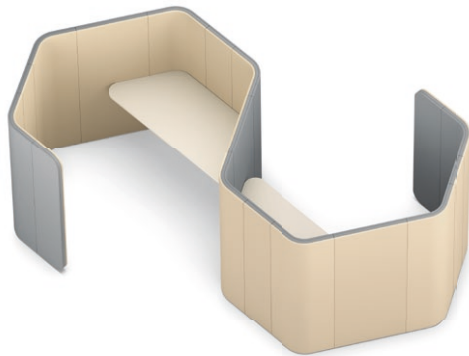

Application areas

- 1** Spaces for individual work
- 2** Areas for video and phone conferences
- 3** Hubs & intermediate areas

se:hive

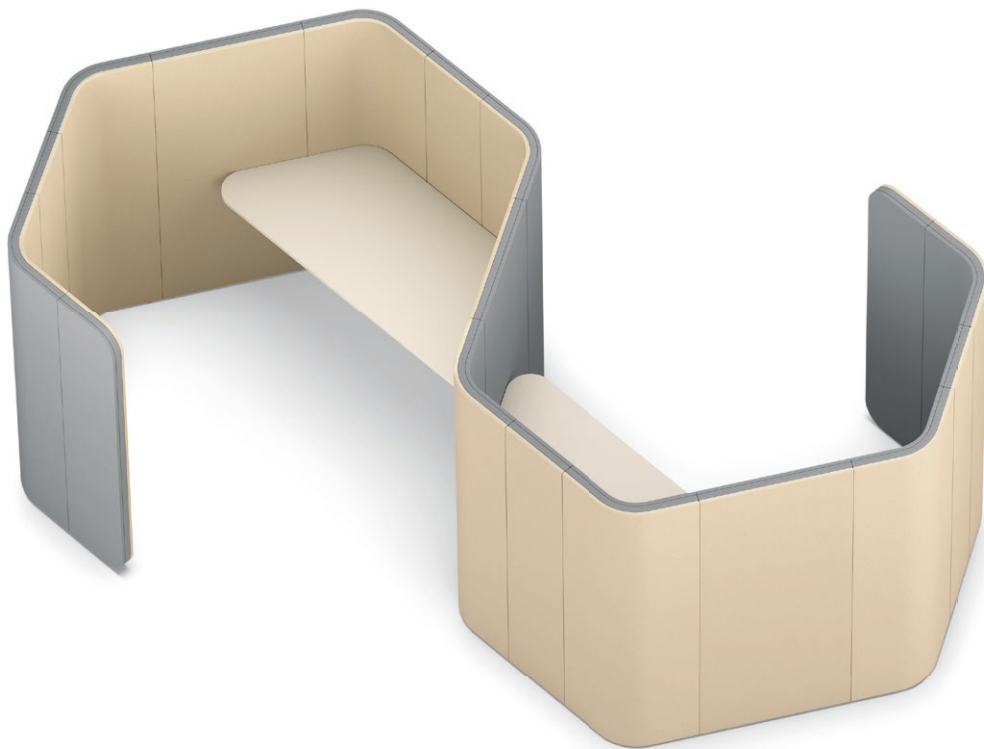

● se:hive

A safe haven in a modular design, se:hive provides acoustic and visual screening, e.g. for video and telephone conferences. Its flexible and space-efficient design makes it ideal for use in intermediate areas.

se:hive

Retreat for temporary work

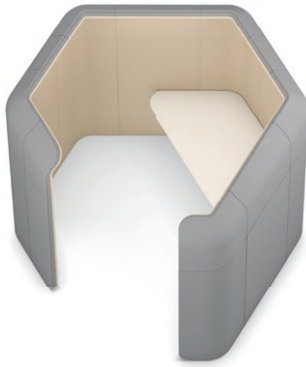

As a retreat for concentrated work, se:hive offers acoustic and visual screening. Thanks to its rounded edges and organic design, it can be harmoniously integrated into open-plan working environments. The modular design, the variety of colours and materials and the availability of different heights also ensure a high degree of configuration and design options. Ideal for video and telephone conferences, se:hive makes acoustic and visual screening possible without being restrictive.

Advantages

- The temporary retreat in a modular design provides acoustic and visual screening.
- se:hive can be used perfectly in interior design as an architectural and structuring element with a variety of configuration options.
- The different heights make a space of retreat suitable for many different applications.

Features

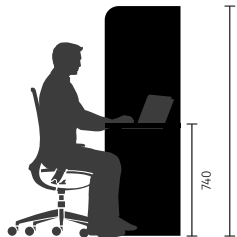

- The electrification is controlled via the table (EPOS) and does not have to be laid through the walls.
- The inner core made of wood fibreboard is 100% recyclable.
- se:hive makes ergonomic working possible through the use of two working heights, 740 mm and a sitting/standing area of 650-1280 mm.
- A space of retreat is ideal for video and telephone conferences.
- se:hive is equipped with adjustable plastic glides.
- In the low version, the fabric is not glued but simply stretched and covered.

Options/accessories

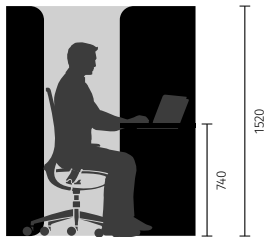

- This safe-haven is available in two basic shapes: rectangular or honeycomb.
- A space of retreat can be optionally equipped with a back screen.
- A motorised height-adjustable table can be selected as an option.
- You can choose from several table depths and widths.
- The cover strip can be powder-coated or covered with fabric.
- A cable tray can be selected.

se:hive is sustainable.

Social responsibility

- se:hive impresses through its acoustic efficiency.
- A space of retreat supports mental well-being.

Economy

- se:hive is simple to install and remove.
- A space of retreat can be reversibly dismantled.

Ecology

- The wood comes from sustainably managed forests.
- The core material made from wood fibres reduces CO₂ and is completely recyclable.

Sedus pursues a holistic approach to sustainability based on the three pillars of social, ecology and economy. The goal of becoming CO₂-neutral at its administrative and production sites by 2025 is actively supported through the development of innovative products and efficient production methods. Sedus is also committed to social projects, education and health through two foundations to which the company is majority-owned, thus making a positive contribution to society. With the “Sedustainable” initiative, Sedus designs holistic workplace solutions that both protect the planet and improve the quality of life of its employees. We really care.

We really care

Designed, engineered, crafted **in Germany. Since 1871.**
